

Women in Global Science:

Advancing Careers Through International Collaboration

Dr. Kathrin Zippel

Lecture and Discussion

Monday, March 26, 7:00 – 8:30 p.m.
Campanile Room, Memorial Union

- ✓ *How can international collaboration contribute to a more inclusive academic world?*
- ✓ *What challenges and opportunities result from the globalization of science?*

Award winning-author and associate professor of sociology at Northeastern University, Dr. Kathrin Zippel is an expert on gender, science and organizations. Her research explores gender and global transformations of science. She argues that global science is the new frontier for women, providing both opportunities and challenges as gender shapes the dynamics and practices of international research.
